

DART Orange Line to North Irving/DFW

## North Lake College

### Construction Update

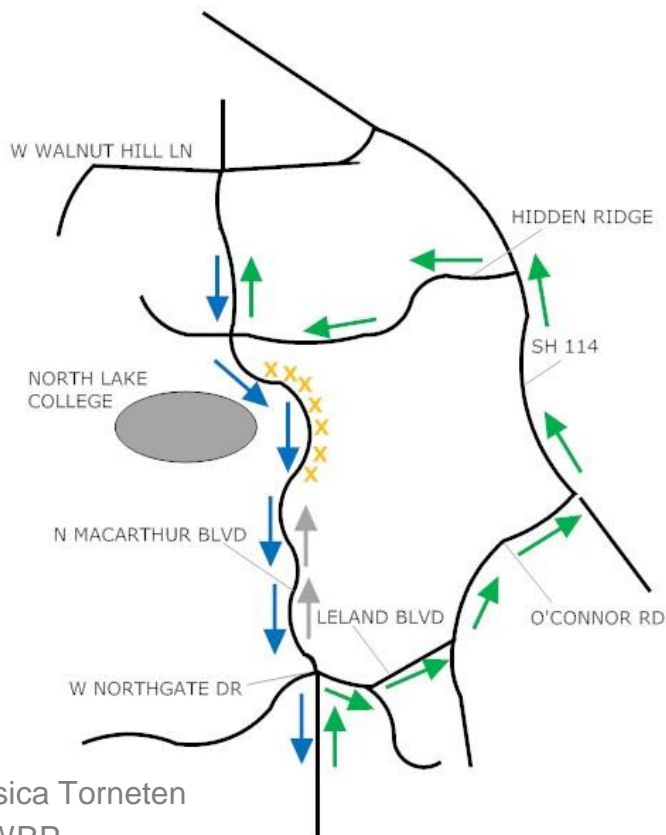

The DART Orange Line construction is quickly moving along the corridor and into the North Lake College area. Construction activities will be in preparation for the light rail system that will extend from downtown Dallas, through Las Colinas, and eventually connect to the DFW airport. Currently, construction activities in this area include utility relocations and bridge structure work that may require traffic impacts to MacArthur Blvd and the entrance to North Lake College. In an attempt to minimize these traffic impacts, some night work may be required.

Utility relocations and bridge structure activities will be on-going for the next few months.

In an attempt to minimize impacts, weekly construction updates are emailed out. This helps provide a more definitive answer to many construction questions, and provides notice to areas that may experience upcoming traffic delays or construction activity.

You can register for Orange Line Construction Updates online at [www.dart.org](http://www.dart.org).

*Beginning the morning of Saturday, March 13, northbound MacArthur will be closed to thru traffic just after Windsor View to Hidden Ridge. These closures are required to provide a safe work area as crews complete drill shaft operations for the bridge structure that will extend over MacArthur Blvd. To minimize traffic impacts, crews will be working through the night to complete these operations. Traffic will be restored on Sunday, March 14. Please note that all dates are tentative as they do not account for weather delays or other schedule impacts.*
